

# Menu and Widgets

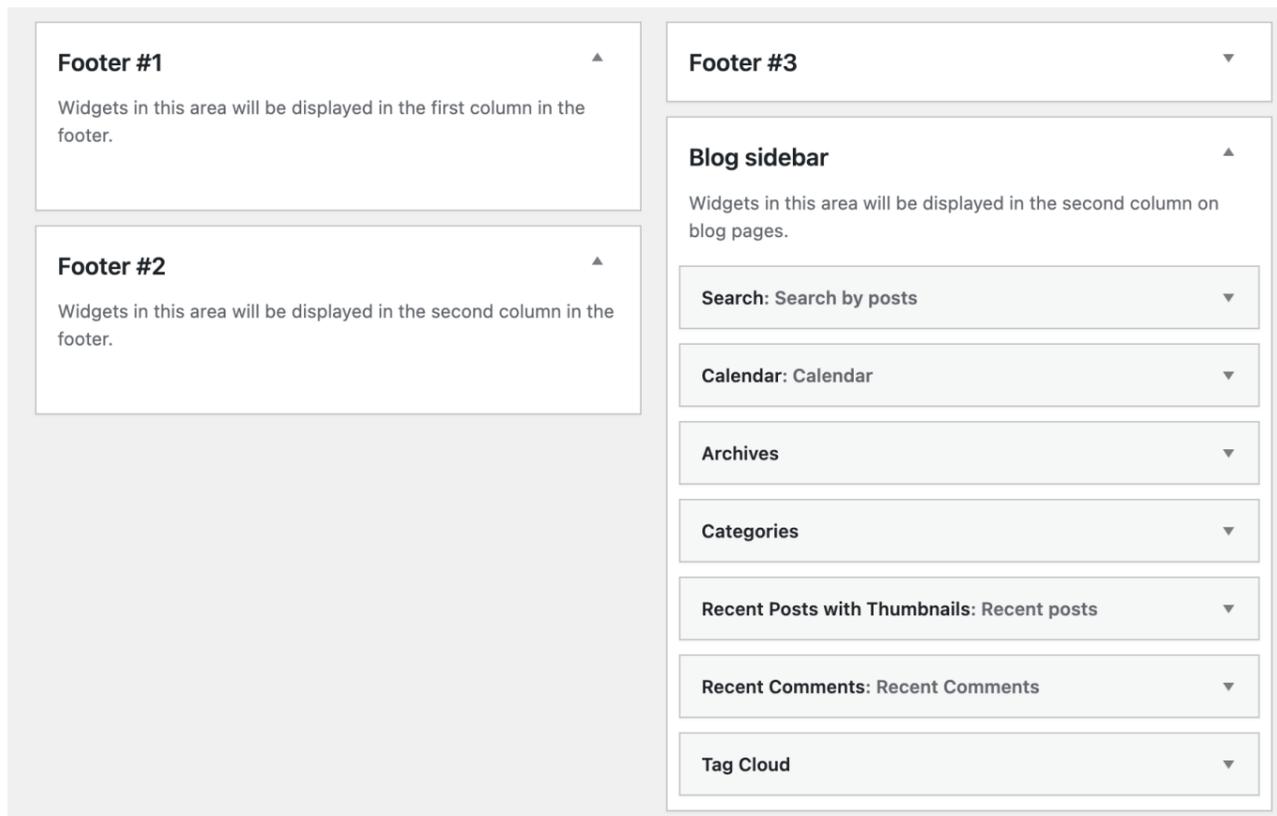

## Menu

Go to **Appearance** ⇒ **Menus** to set the header menu. If you already imported the demo content, we set optimal pages, so you can change order and level now (theme supports up to 3 levels in the header). You can use different menus for the header (with multilevel items), add new pages or remove them here.

## Widgets

Widgets are customizable blocks visible on blog, post pages and footer of the site. You can manage them in the **Appearance** ⇒ **Widgets** section. You can use any of the standard WordPress widgets, or you can additionally install new widgets in the Plugins menu, but we can't guarantee full support for them.

## Widget Areas

The theme supports four widget areas:

**Footer #1** – widgets in this area will be displayed in the first column in the footer.

**Footer #2** – widgets in this area will be displayed in the second column in the footer.

**Footer #3** – widgets in this area will be displayed in the third column in the footer.

**Blog sidebar** – widgets in this area will be displayed in the second column on blog pages.

## Widgets Support

You can additionally install new widgets in the **Plugins** menu, but we can't guarantee full support for them. The list of the most popular widgets (you can see these widgets on the preview website) the theme support:

**Navigation Menu** – add a navigation menu to your sidebar.

**Text** – arbitrary text.

**Mailchimp Sign-Up Form** – displays your Mailchimp for WordPress sign-up form.

**Search** – a search form for your site.

**Calendar** – a calendar of your site's posts.

**Archives** – a monthly archive of your site's posts.

**Categories** – a list or dropdown of categories.

**Recent Posts** – your site's most recent posts.

**Recent Comments** – your site's most recent comments.

**Tag Cloud** – a cloud of your most used tags.

**Cart** – display the customer shopping cart.

**Recent Viewed Products** – display a list of a customer's recently viewed products.

**Product Categories** – a list or dropdown of product categories.

**Product Tag Cloud** – a cloud of your most used product tags.

**Active Product Filters** – display a list of active product filters.

**Filter Products by Price** – display a slider to filter products in your store by price.

**Filter Products by Rating** – display a list of star ratings to filter products in your store.

**Product Search** – a product search form for your store.

**Recent Product Reviews** – display a list of recent reviews from your store.

**Product Tag Cloud** – a cloud of your most used product tags.
