Installation of the demo content

Please follow the easy steps below to install the theme and the demo content:

To install the theme you must have a working version of WordPress already installed. Make sure you have a clean WordPress setup. This [installation guide](#) will help you to install WordPress.

If **you are new to WordPress** please check [Lessons](#).

We also recommend you [WordPress Documentation](#) and [WordPress FAQs](#) as a handbook.

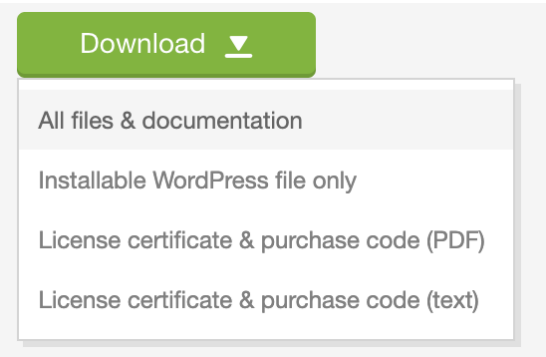

Technical Requirements

You need web hosting with:

- **PHP** version 7.4 or greater. **We recommend version 7.4** as the most supported version by plugins.
- MySQL version 5.6 or greater OR MariaDB version 10.1 or greater
- WordPress 5 or greater installed

Please make sure **before** demo installation that the hosting has **PHP 7.4** or greater. Thank you!

How to download the theme?

1. Click on **Download** button
2. Choose "**All files & documentation**"
3. **Unarchive** the downloaded zip file

Theme Installation Guide
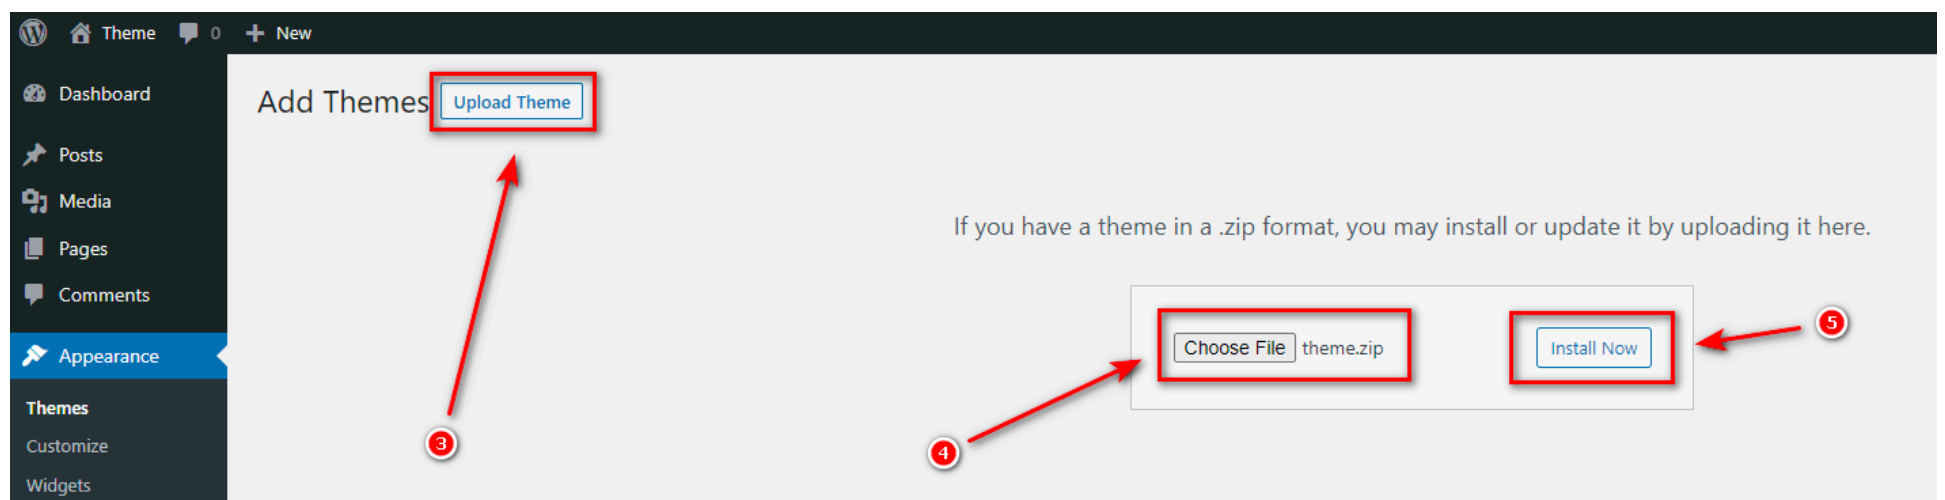

1. Go to **Appearance**

2. Click on **Add New**

3. Click on **Upload Theme**

4. **Choose File** (the installable theme which is called **NameOfTheme**.zip)

|		
> 📁 Documentation	Folder	
> 📁 Licensing	Folder	
@ online-documentation.url	Web site location	
readme.txt	Plain Text Document	
theme-child.zip	ZIP archive	
theme.zip	ZIP archive	

5. Click on **Install Now**.

If it shows issue: "The package could not be installed. The theme is missing the style.css stylesheet." please make sure you are uploading only the installable theme which is called NameOfTheme.zip.

Notice
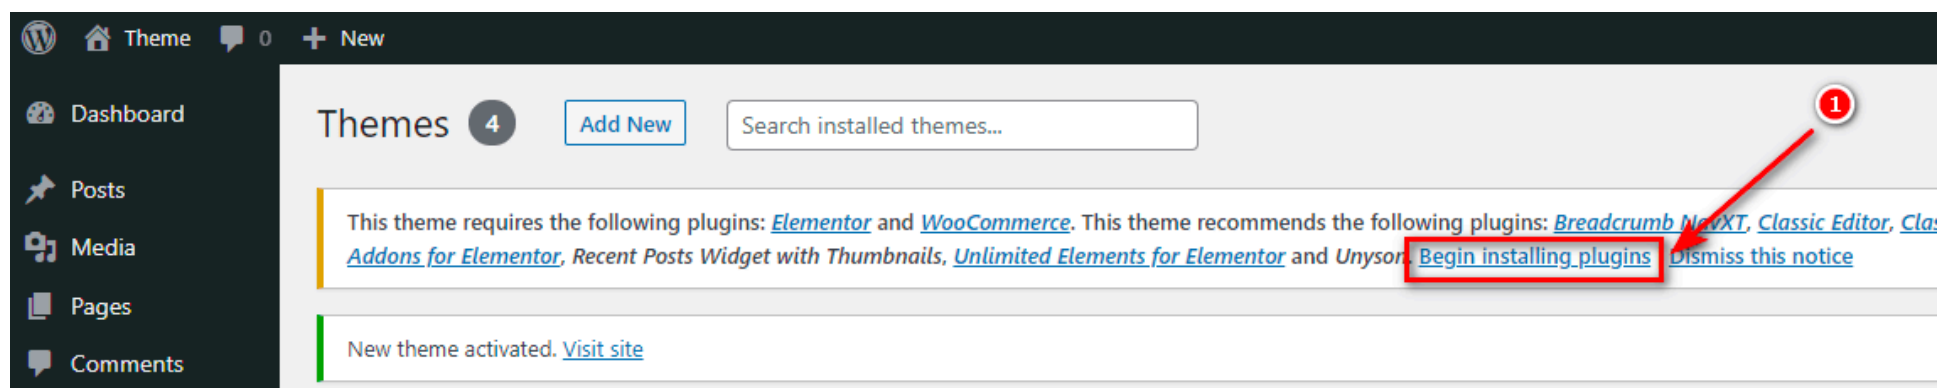

6. Click on **Activate**
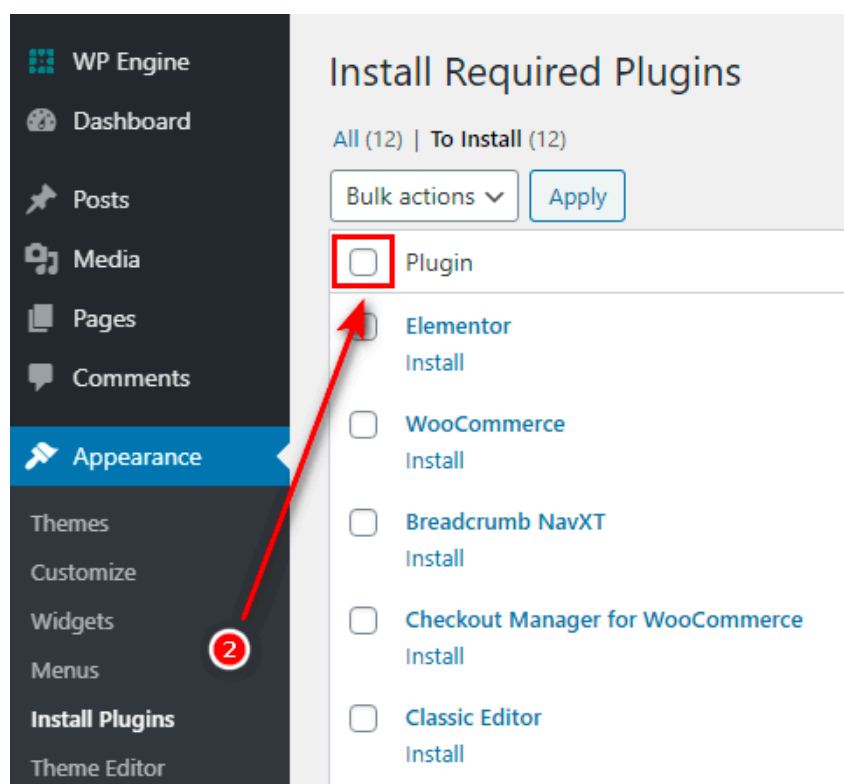

Basic Theme Configuration

1. To make your website look like the demo website you have to install all recommended plugins, BUT if you don't need some of them, just uncheck as necessary.

Elementor is only one required plugin to work demo pages and **Unyson** plugin is only required to install the demo content (you can delete Unyson plugin after demo installation finished).

Start install plugins by clicking on **Begin installing plugins**

2. Select all by clicking on the **top checkbox** OR select only **Elementor** and **Unyson** plugins.

3. Choose **Install** option in **Bulk actions** selector

4. Click once **Apply**

5. **Wait for a little** till plugins are **installing and activating.** The installation time depends on your hosting performance. Usually, it takes about 10-30 seconds.

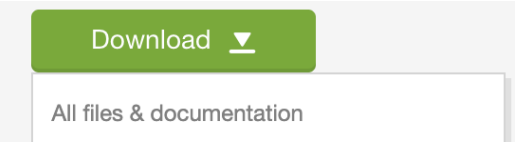

6. Click on **Dashboard**

> Sometimes after clicking on Dashboard (on this step) you will redirect to some plugin beginner setup (like WooCommerce or Elementor). Just skip it all on, do it later after the demo content installed.

Demo Content Installation Guide

1. Download the full pack of the theme on ThemeForest in Downloads – click on **All files & documentation**, it will download a zip file.

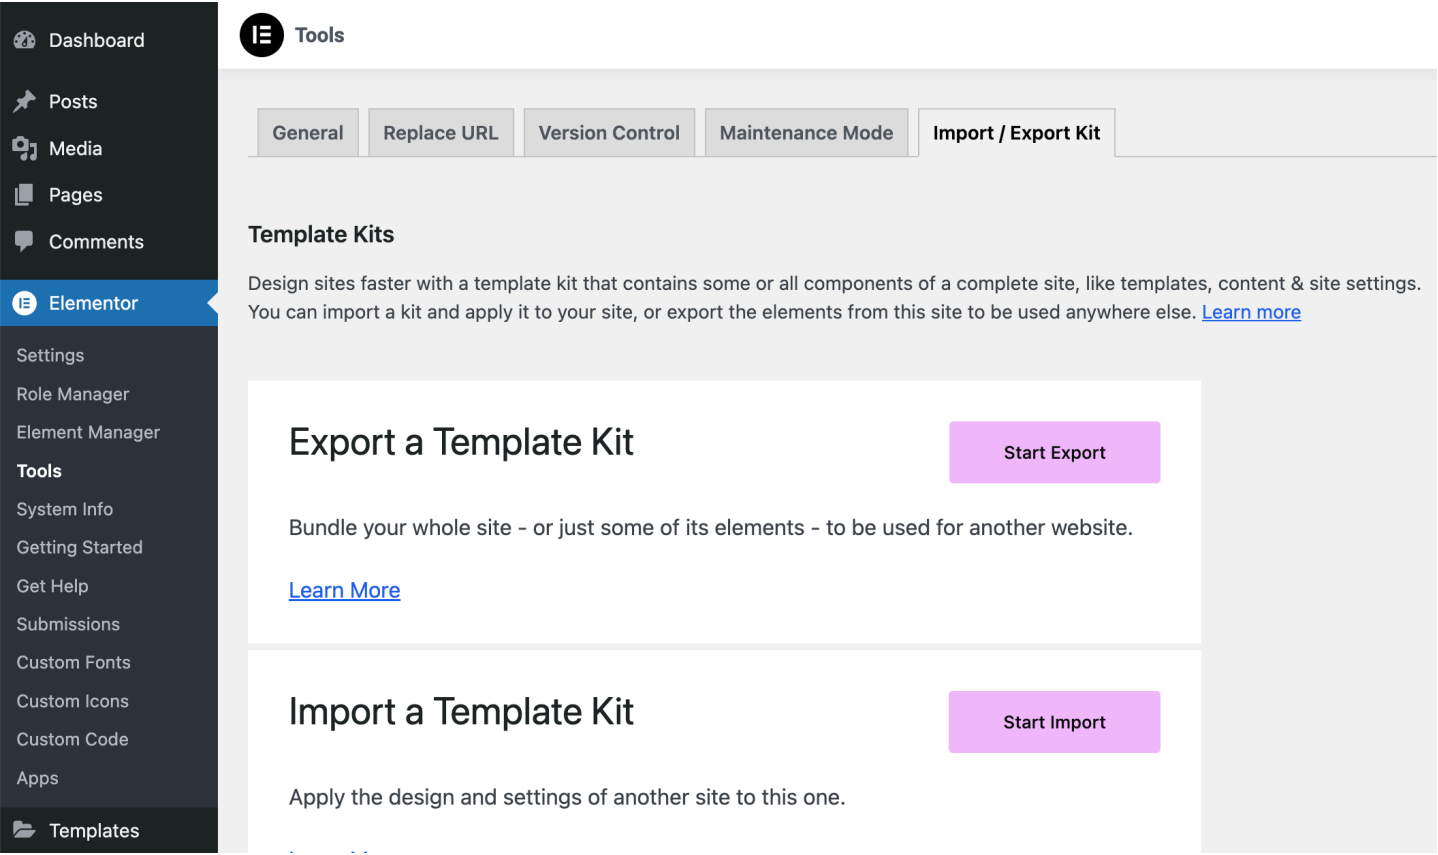

2. Unzip the file and go to folder. The folder contains link to download Elementor Kit file. Open link and download file. For example:

There is a downloaded **zip** file:

elementor-kit.zip
150 KB

3. Go to **Elementor → Tools → Import/Export Kit → Start Import**

4. Use **elementor-kit.zip** file to import Elementor template kit.

Note: In case the Elementor import causes some issue, please check [Elementor help guide](#)

5. **Done**, the imported pages should look like on the demo website, please check **Pages** section in the WordPress admin panel to find them.

Note: If the demo website had the store, please visit WooCommerce plugin to set it up. Thank you!

Possible issues

If the exported demo looks different than the live preview then go to **Elementor ⇒ Tools ⇒ Regenerate CSS ⇒** Click on **Regenerate Files** button.

The demo installation usually works on 99% of hostings, so issues are pretty exceptional. If you have a trouble with the installation, please check the minimal hosting requirements from the Technical Requirements section above.

If the steps above didn't help please ask the [Support](#).
